

FOREMETRIC.AI: PRIVATE BEHAVIORAL DATA INFRASTRUCTURE

Translating analog biological intent into digital economic value.

[SYSTEM STATUS: ONLINE // PRE-SEED // TON ECOSYSTEM // ENCRYPTION: ACTIVE]

POST-LABOR CRISIS AND SYNTHETIC ENTROPY

HUD

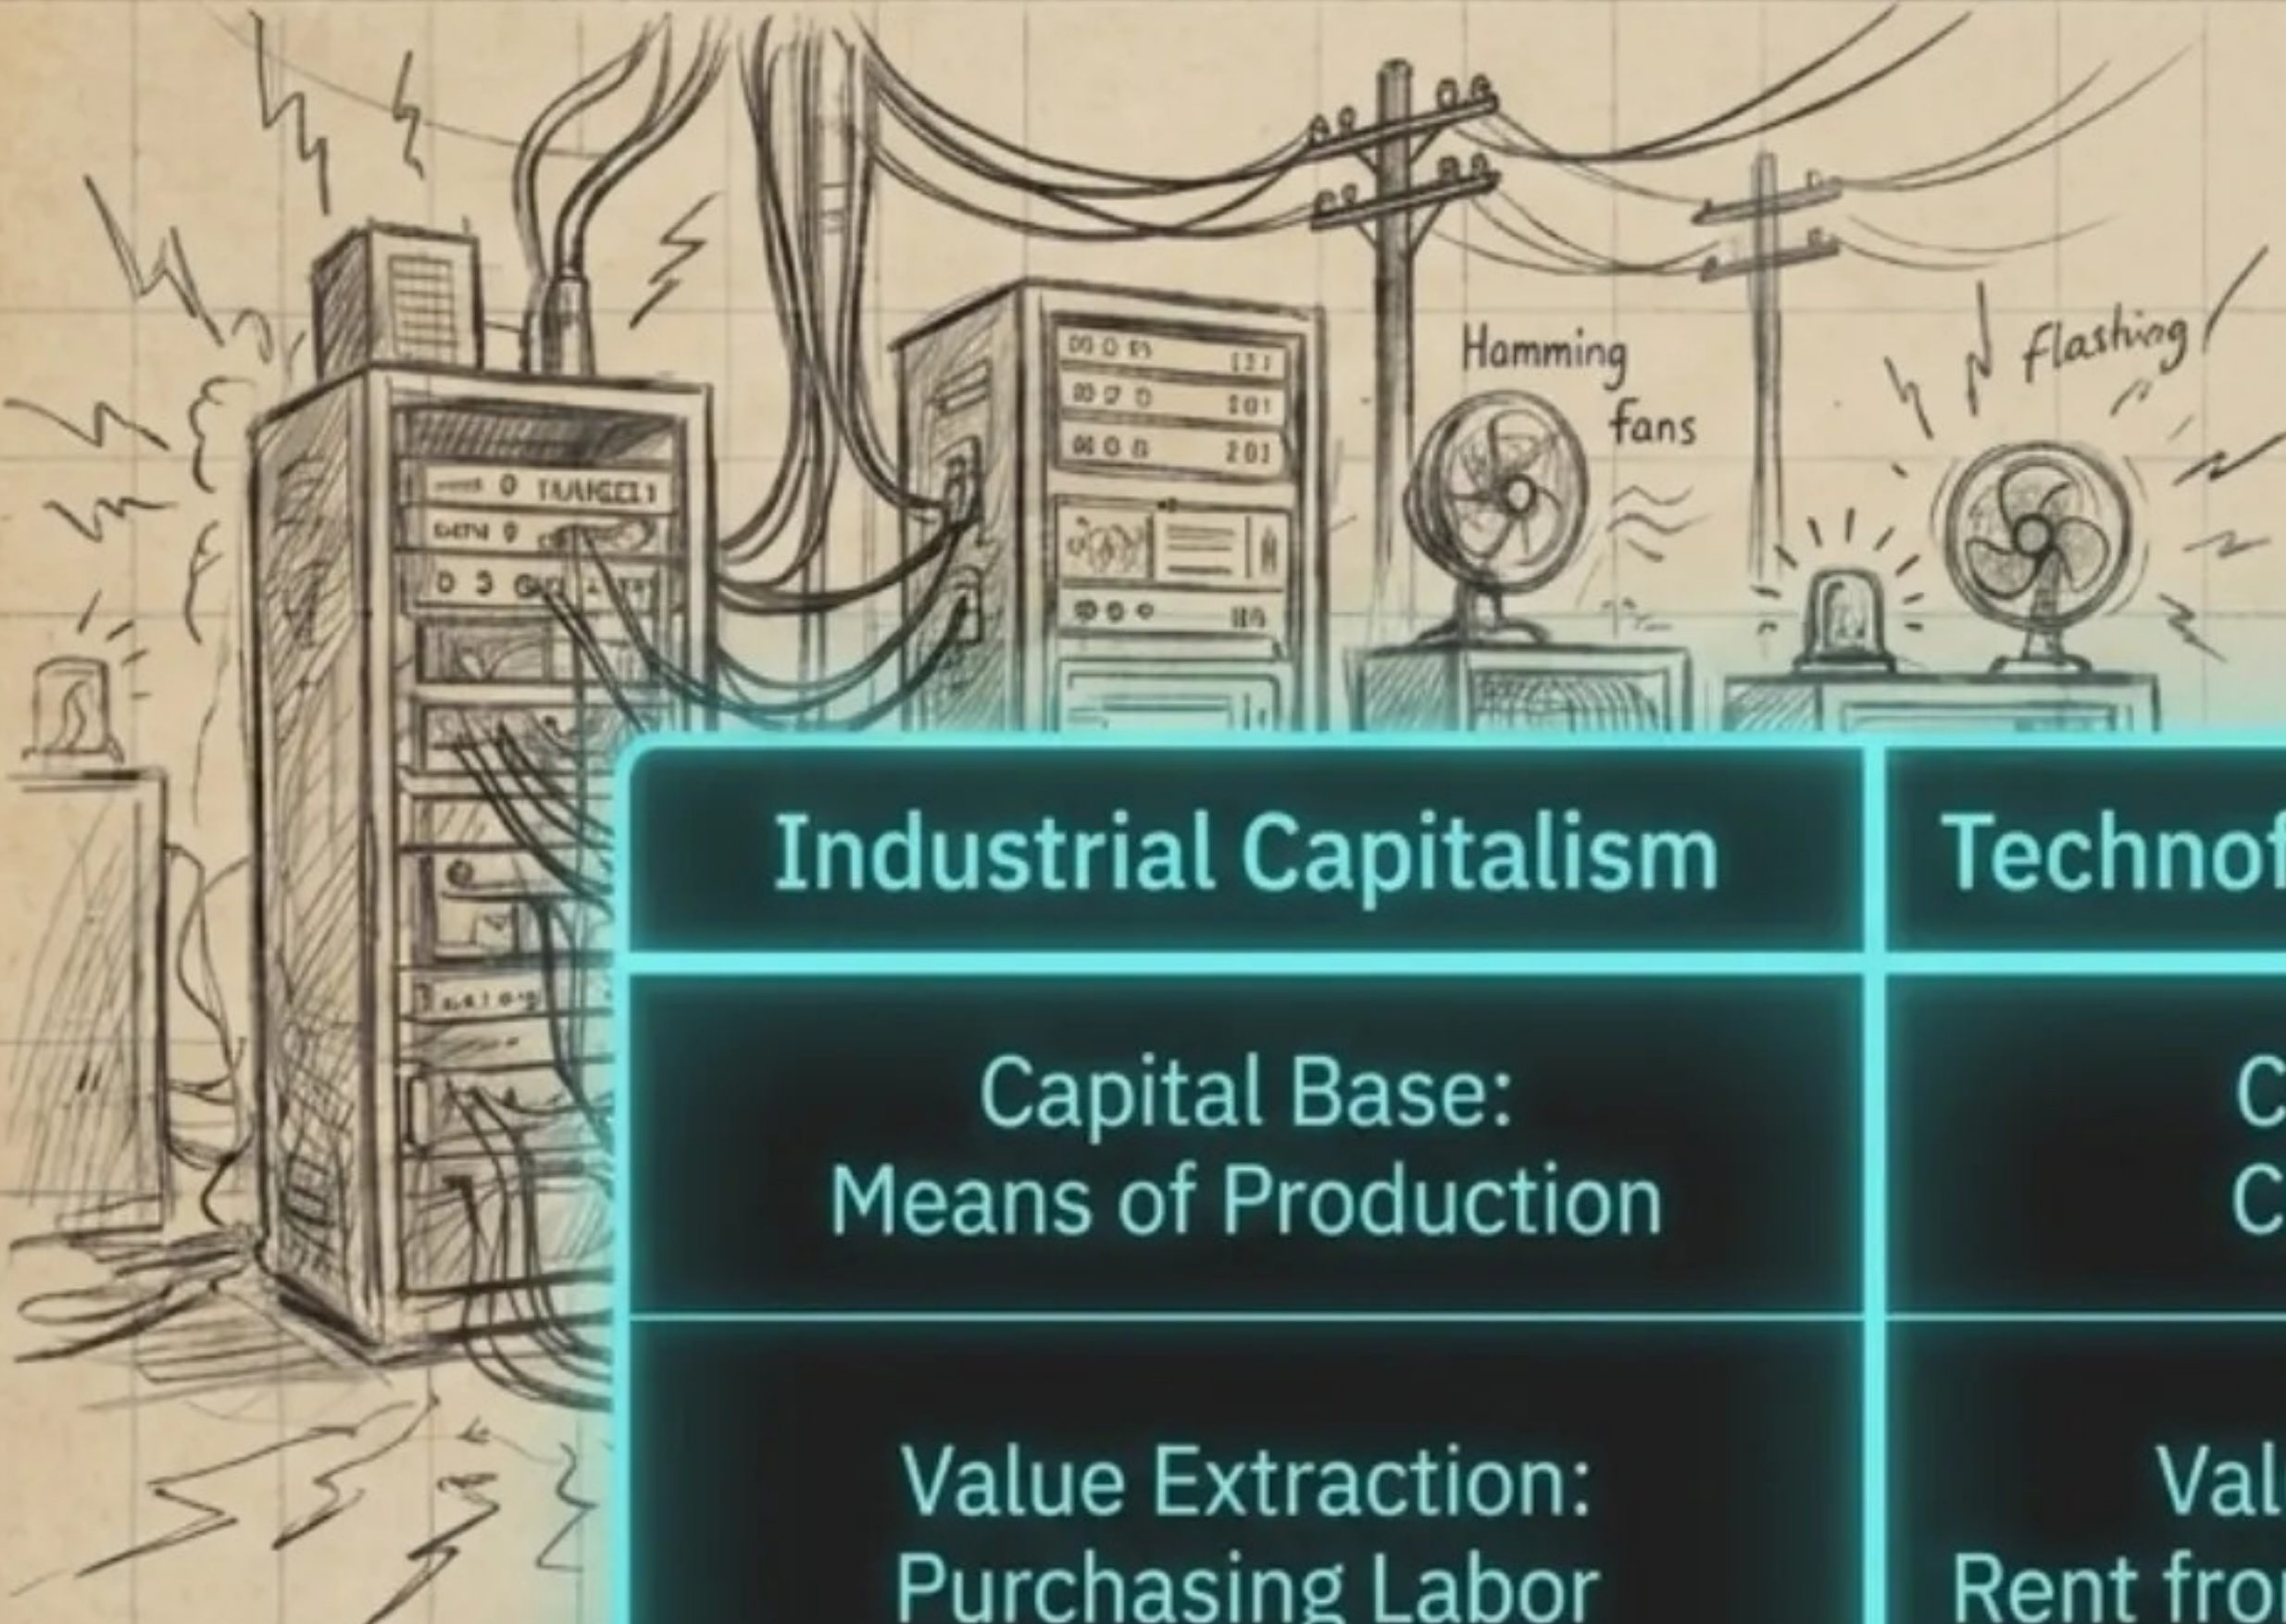

AI Model Collapse.
Training on synthetic content
degrades models by 15-20%
each generation.

HUD

Automation of 300
million cognitive jobs.
Who will be the consumer?

Live, human biological behavior is the only
non-synthetic signal left in the digital
universe.
It is an absolutely scarce asset.

The Evolution of Capital: From Proof-of-Work to Proof-of-Experience

Industrial Capitalism	Technofeudalism (Web2)	ForeMetric (Web3)
Capital Base: Means of Production	Capital Base: Cloud Capital	Capital Base: Sovereign Human Signal
Value Extraction: Purchasing Labor	Value Extraction: Rent from Behavioral Trails	Value Extraction: B2B Cohort Insights (Phase 1: trusted-operator; Phase 2: TEE-attested)
Human Status: Wage Worker	Human Status: Digital Serf	Human Status: Owner of Experience Capital

Proof-of-Work vs. Proof-of-Experience: Instead of burning electricity to solve useless math (SHA-256), we cryptographically verify capital through the living of human life.

PROOF-OF-BEHAVIOR: THE PHYSICS OF HUMAN VERIFICATION

Scripted Bots

Bots generate synthetic paths (linear scroll, identical timings). Instant flag. Zero token yield.

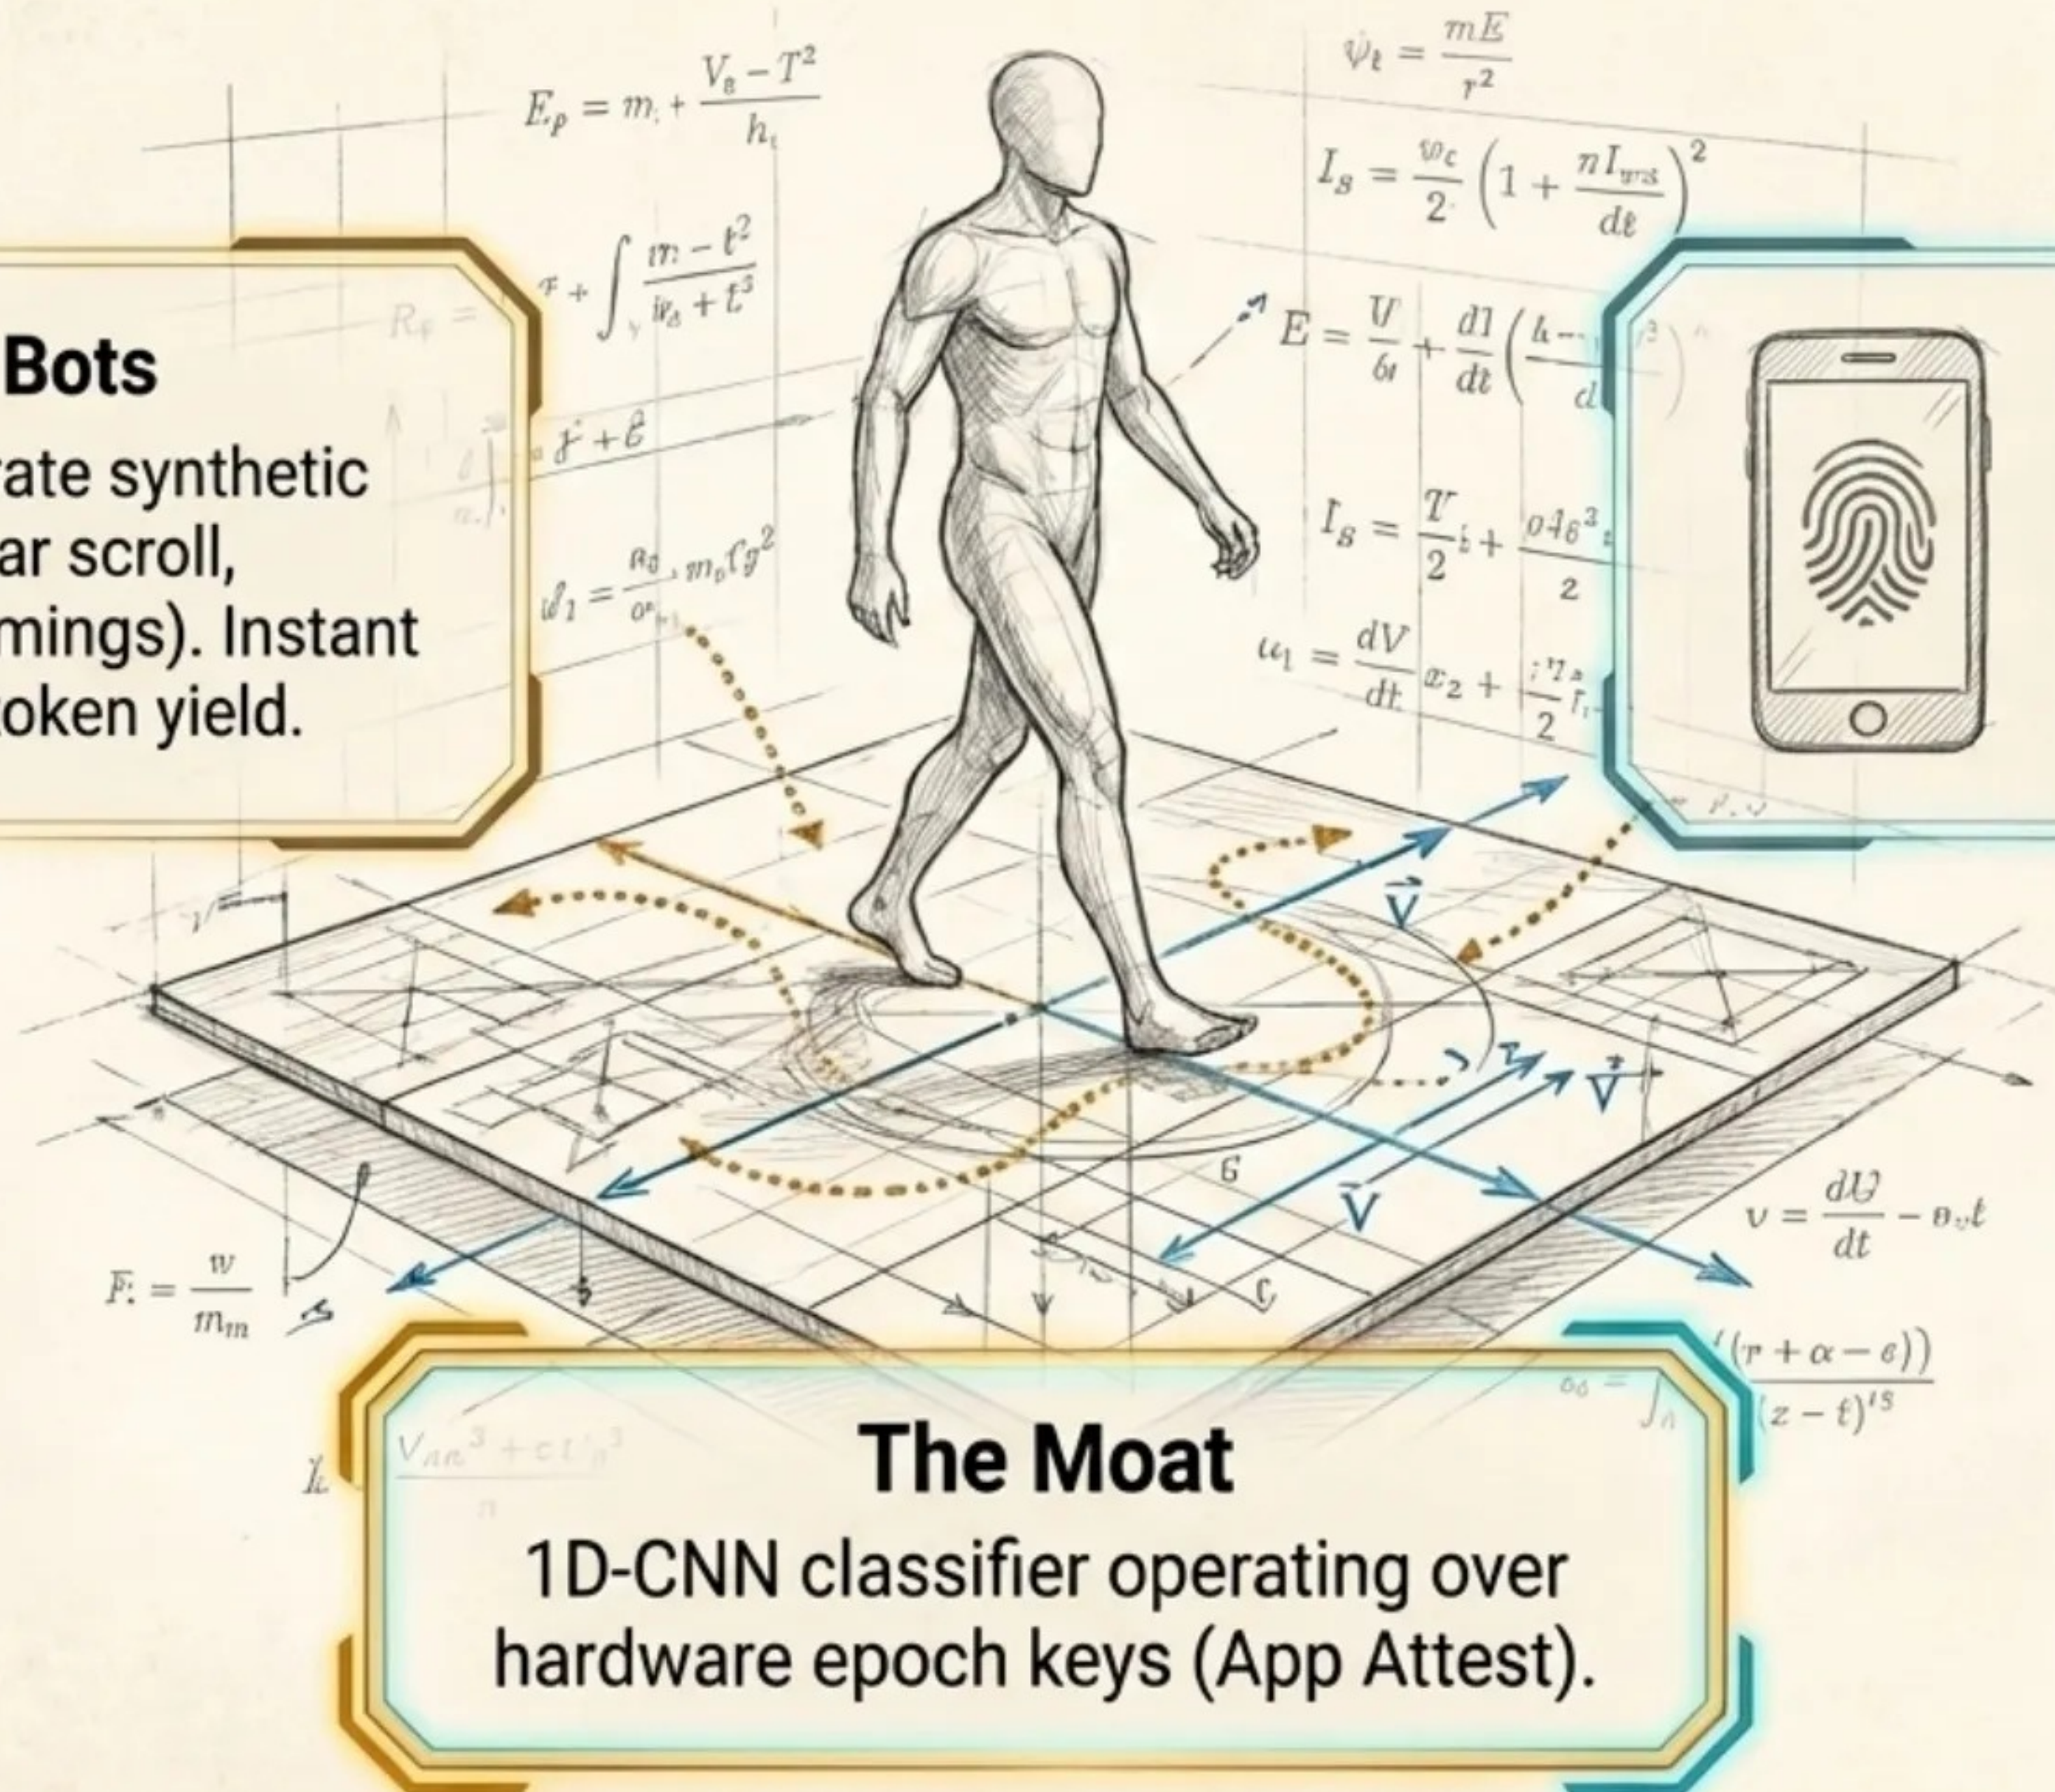

Human Intent

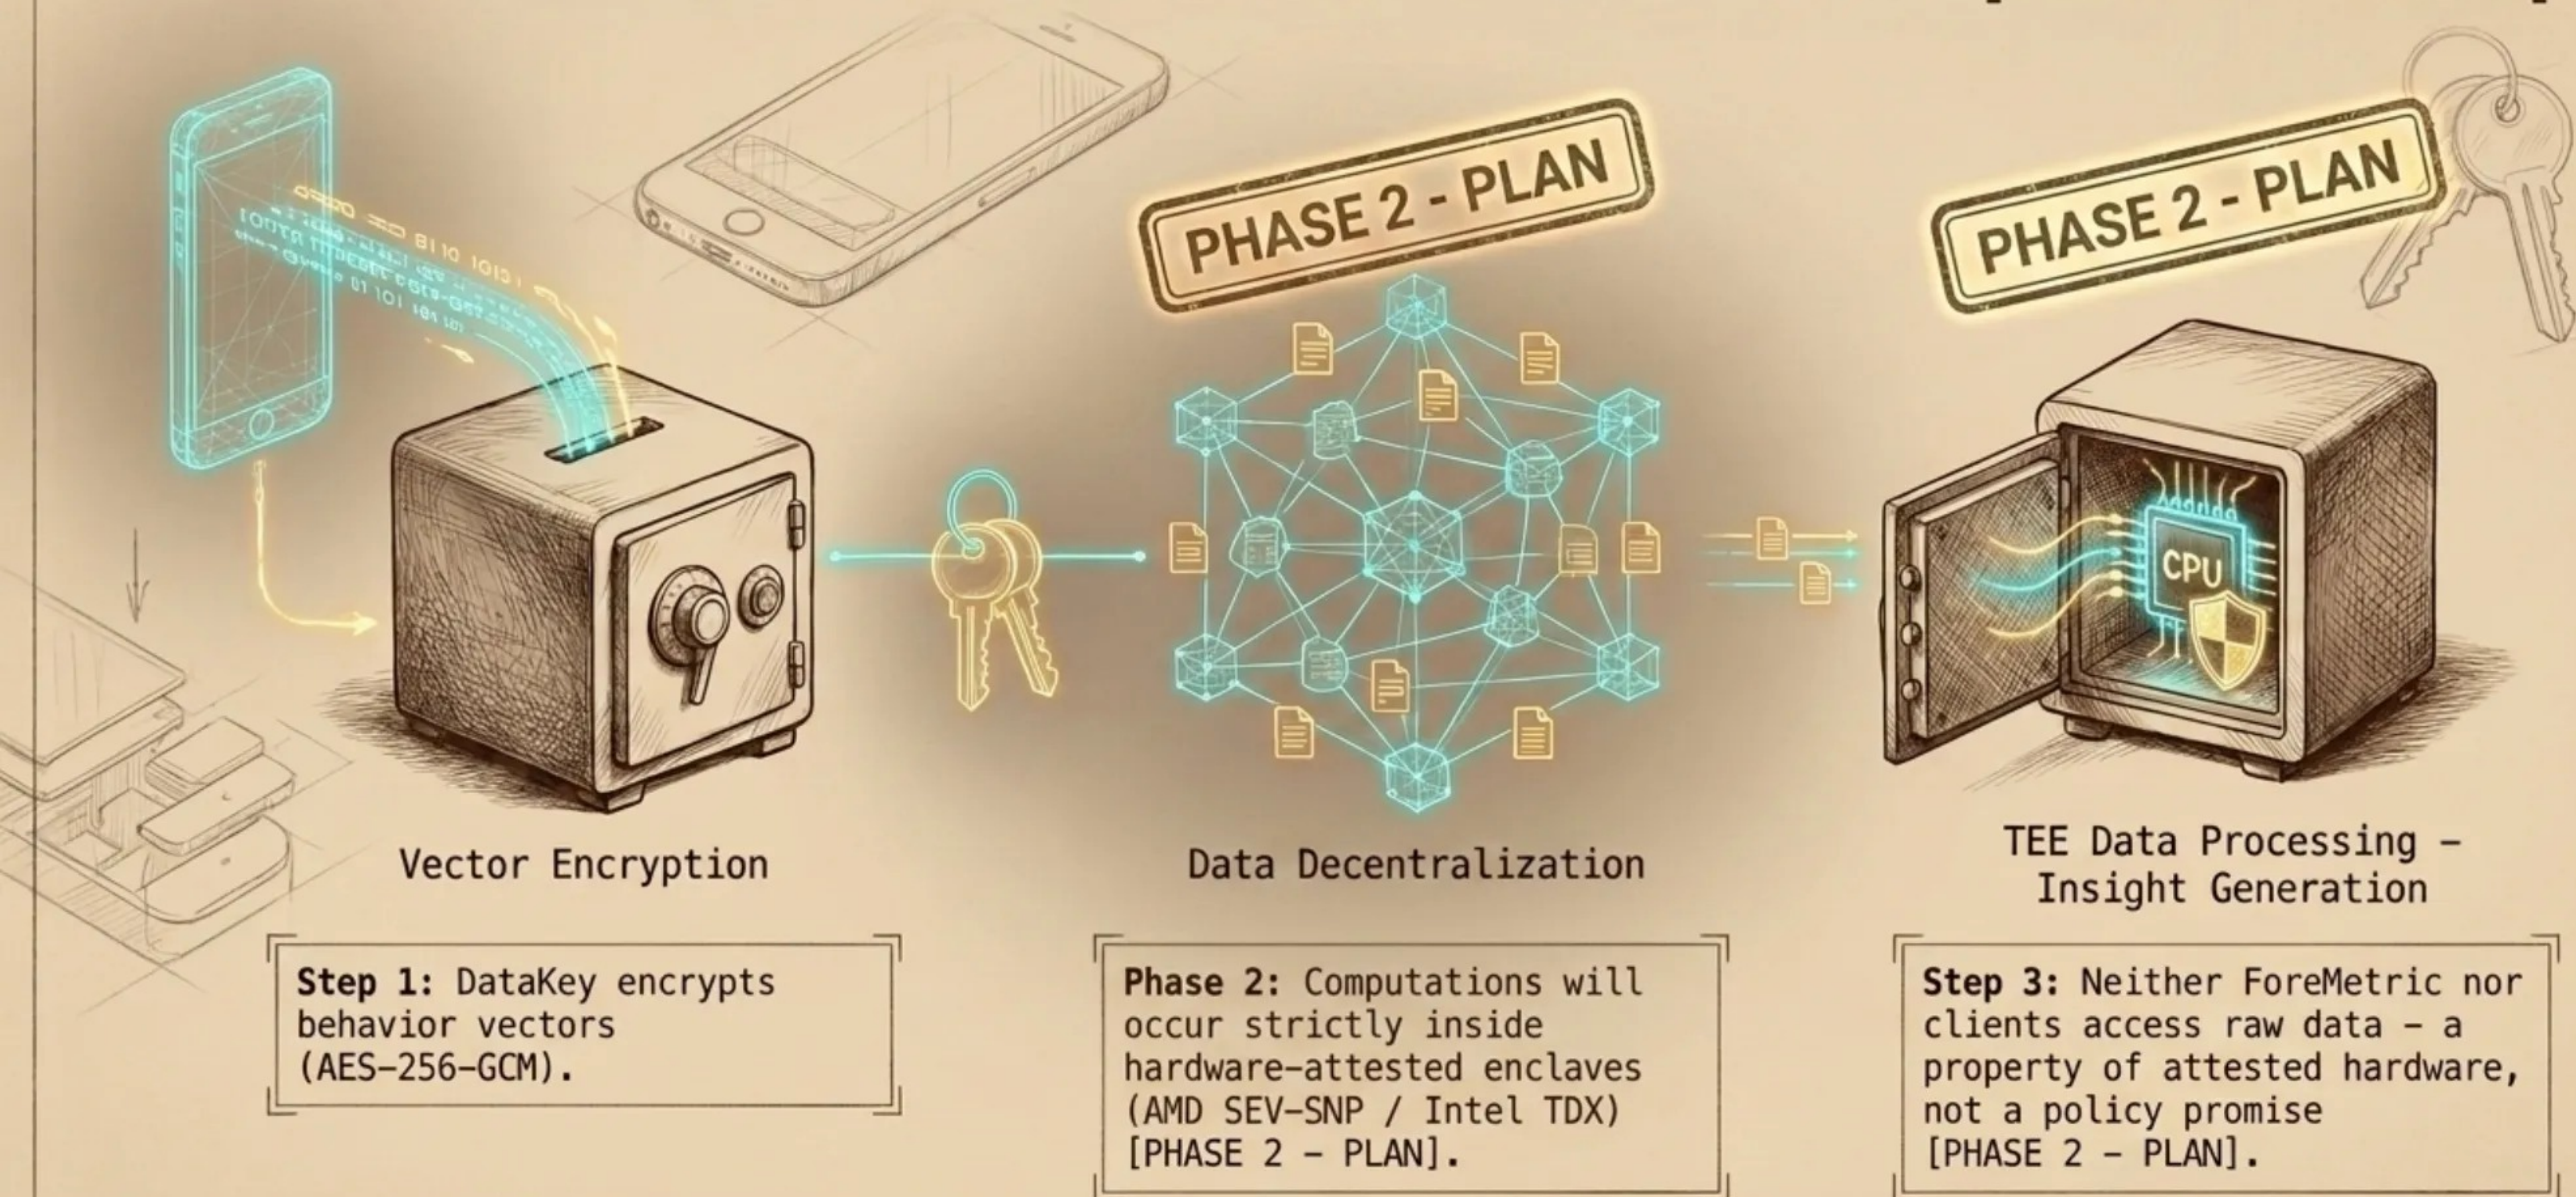

Proven biology (8-12Hz micro-tremors, saccadic pauses, Poisson distribution).

The Moat

1D-CNN classifier operating over hardware epoch keys (App Attest).

THE PHYSICS OF TRUST: ARCHITECTURE AND DUAL ENCRYPTION [PLANNED PHASE 2]

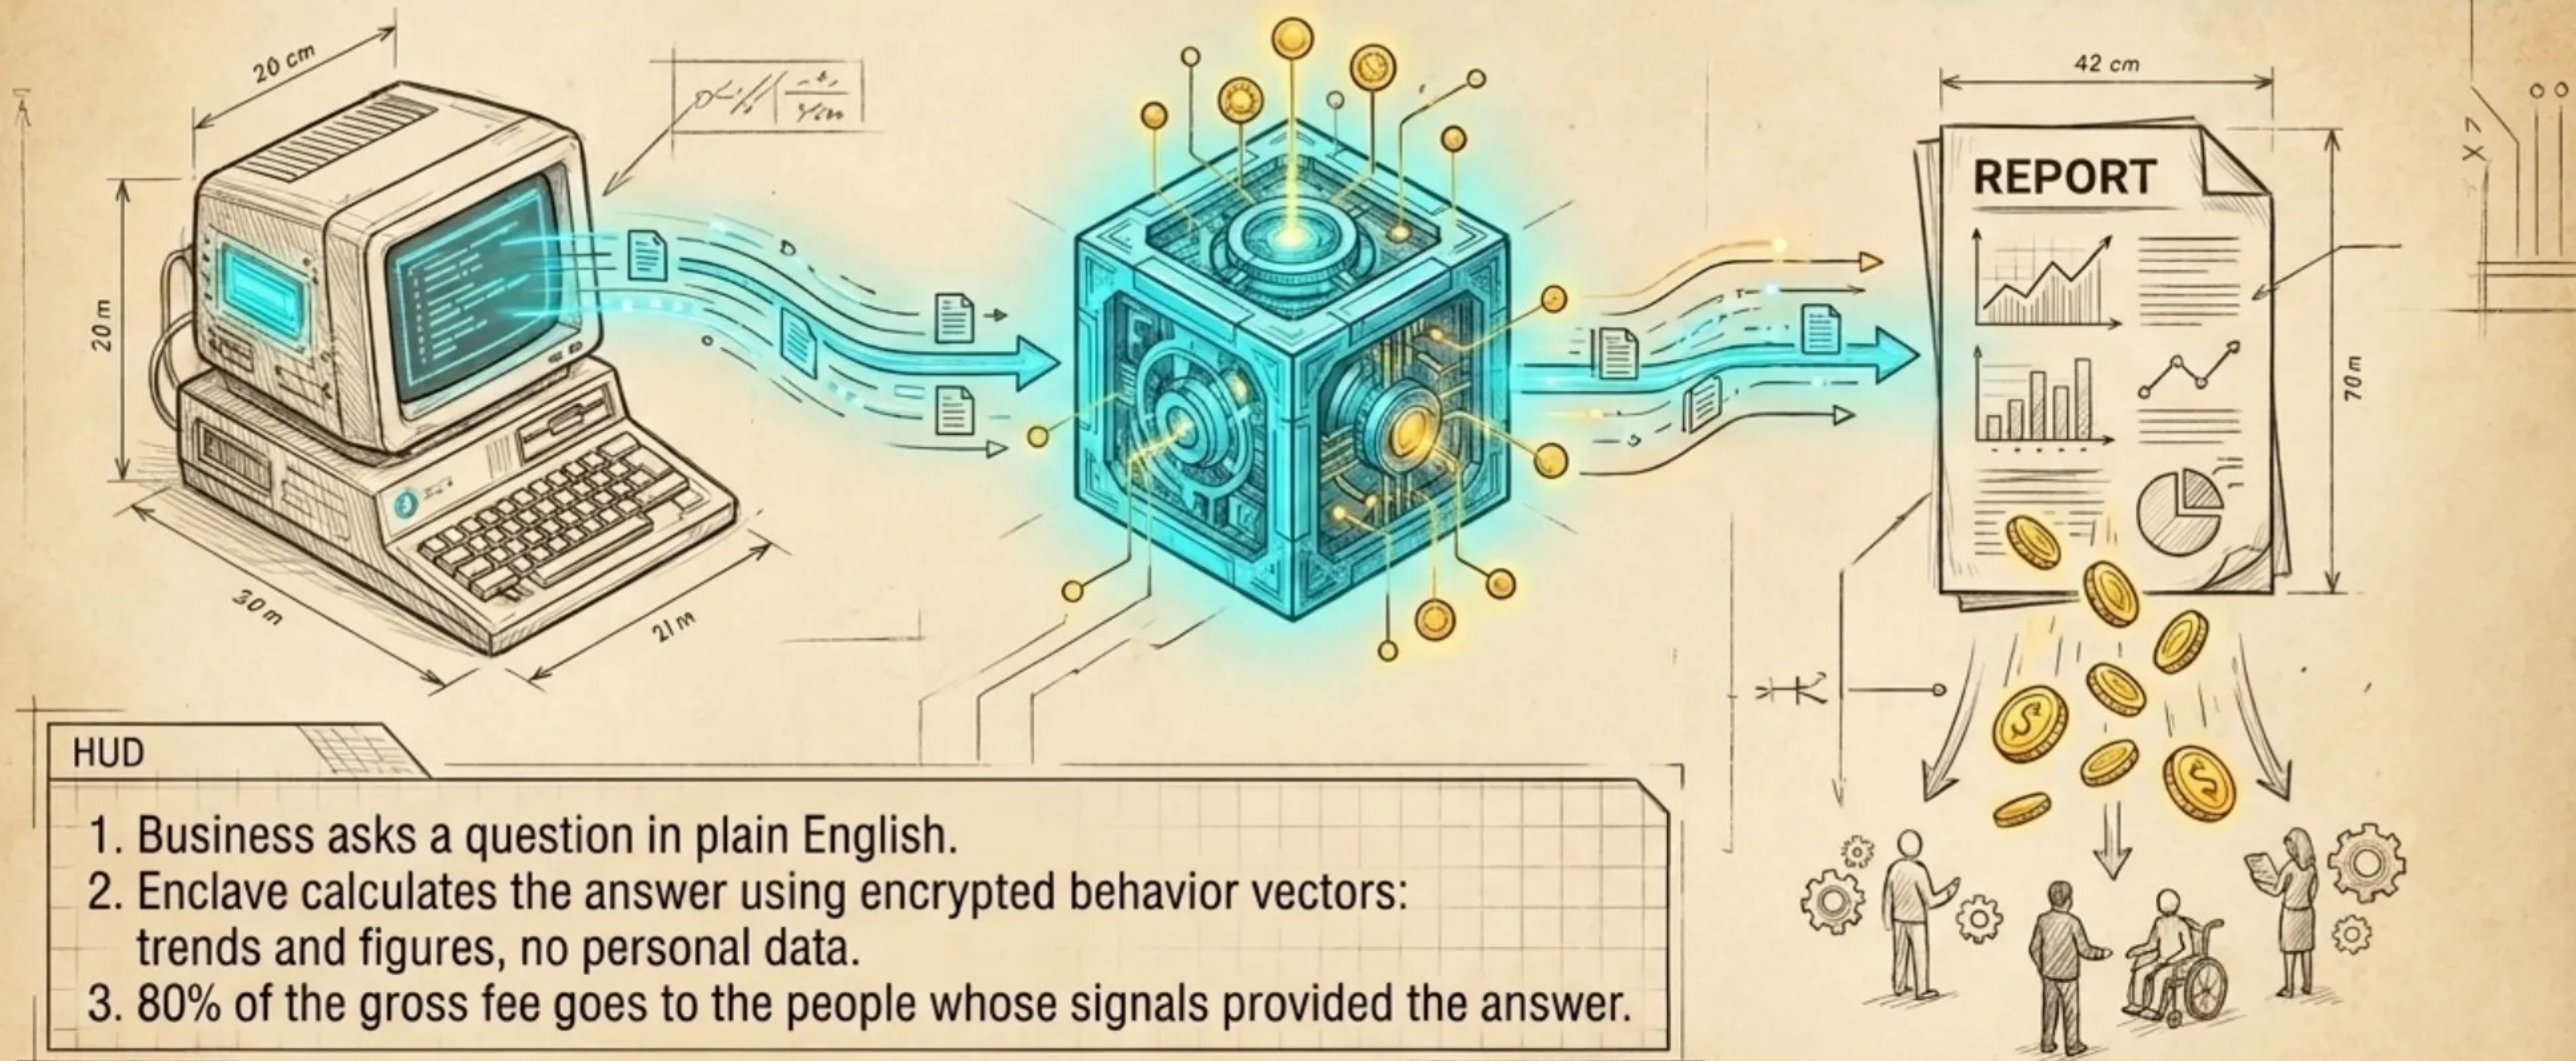

Phase 1 today: server-side under disclosed trusted-operator (AWS KMS), no attestation.

PASSIVE EARNING AND CONTROL

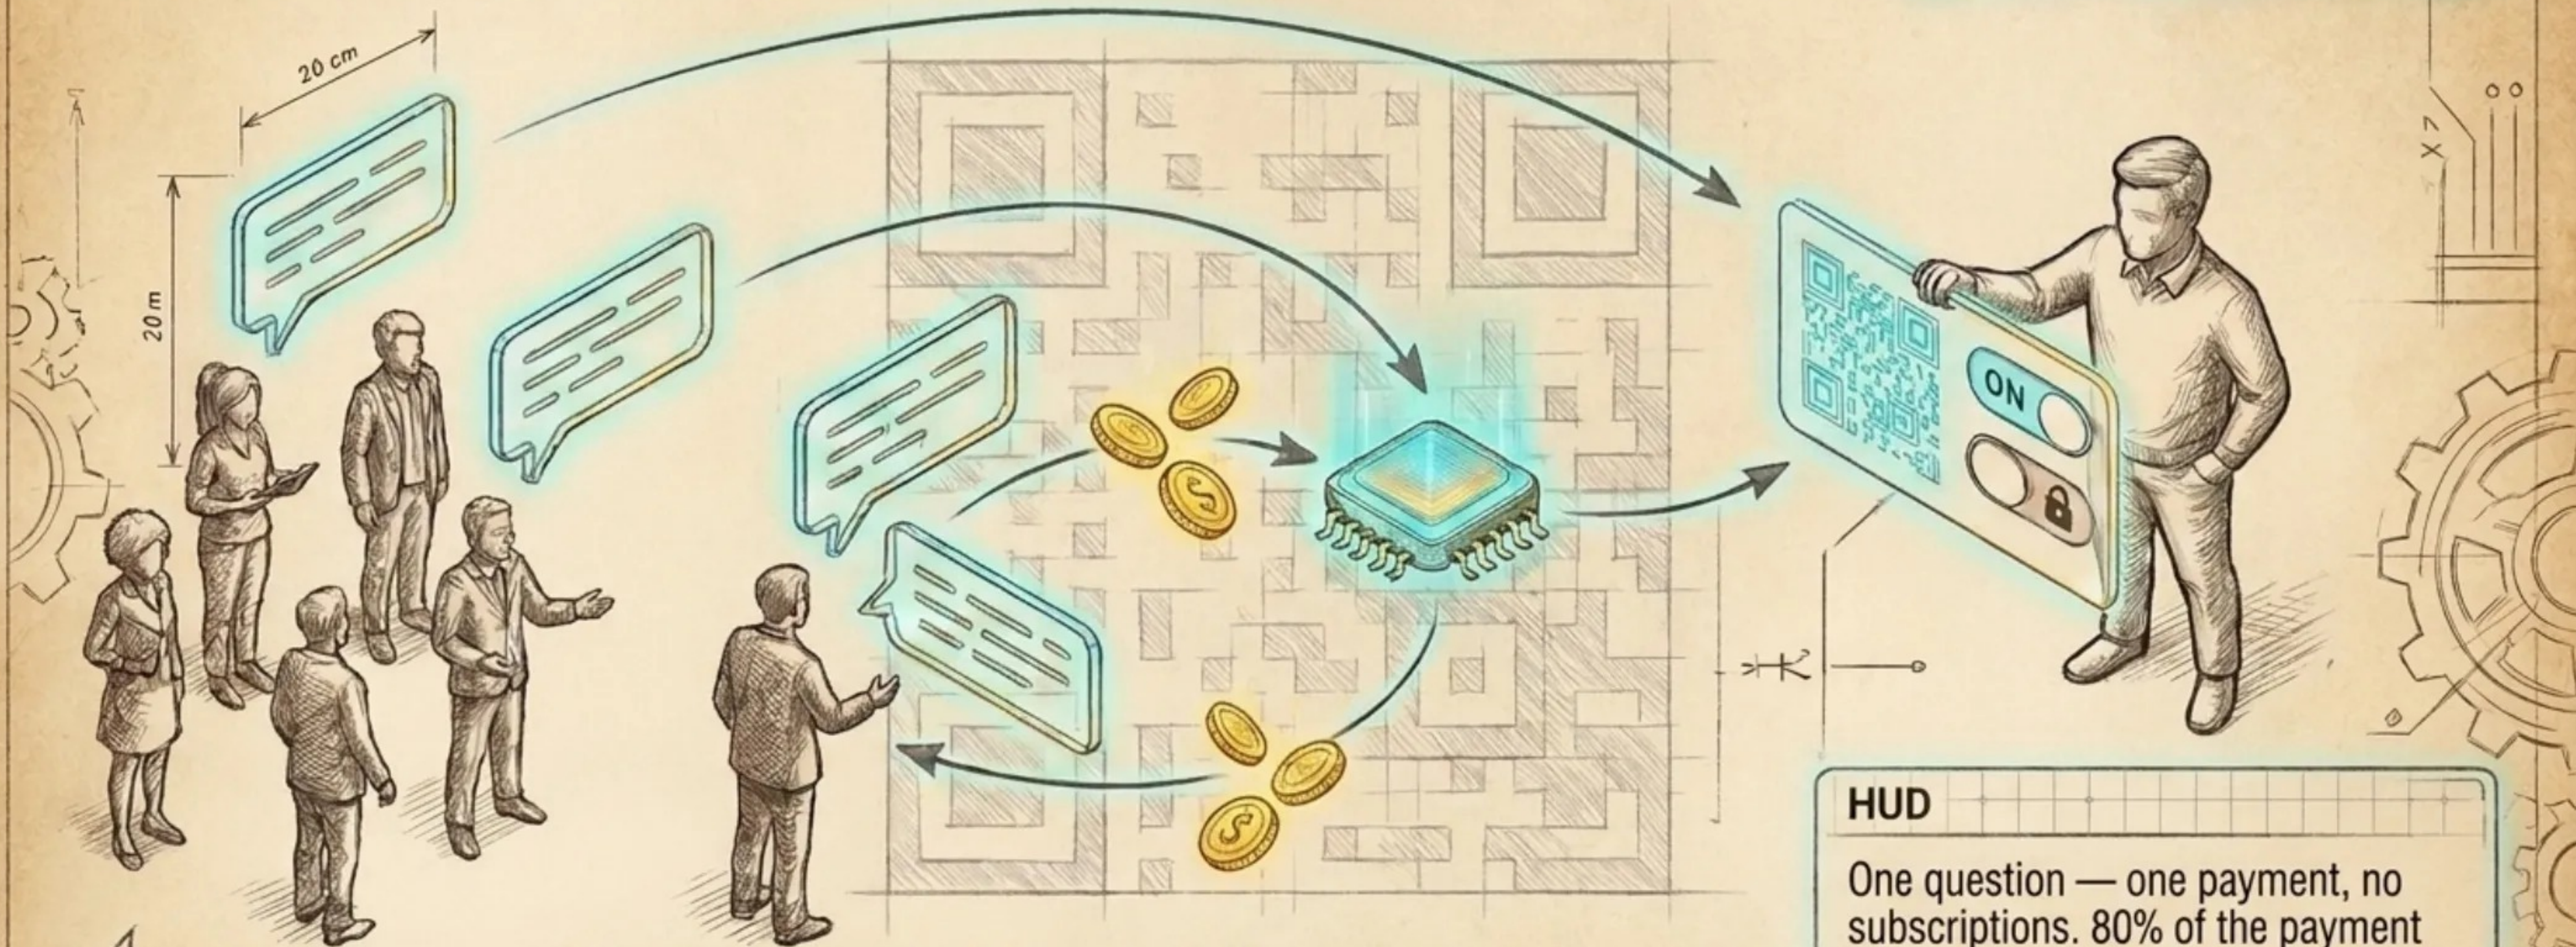

B2B TERMINAL: ANSWERS, NOT DATASETS

PHASE 2 - PLAN

SIGNAL PASSPORT: HUMAN-TO-HUMAN (C2C)

PHASE 2 - PLAN

5. The answer is not just "yes/no": AI inside the enclave answers subscriber questions based strictly on categories unlocked by the creator, and cites them.

HUD

One question — one payment, no subscriptions. 80% of the payment goes to the creator.

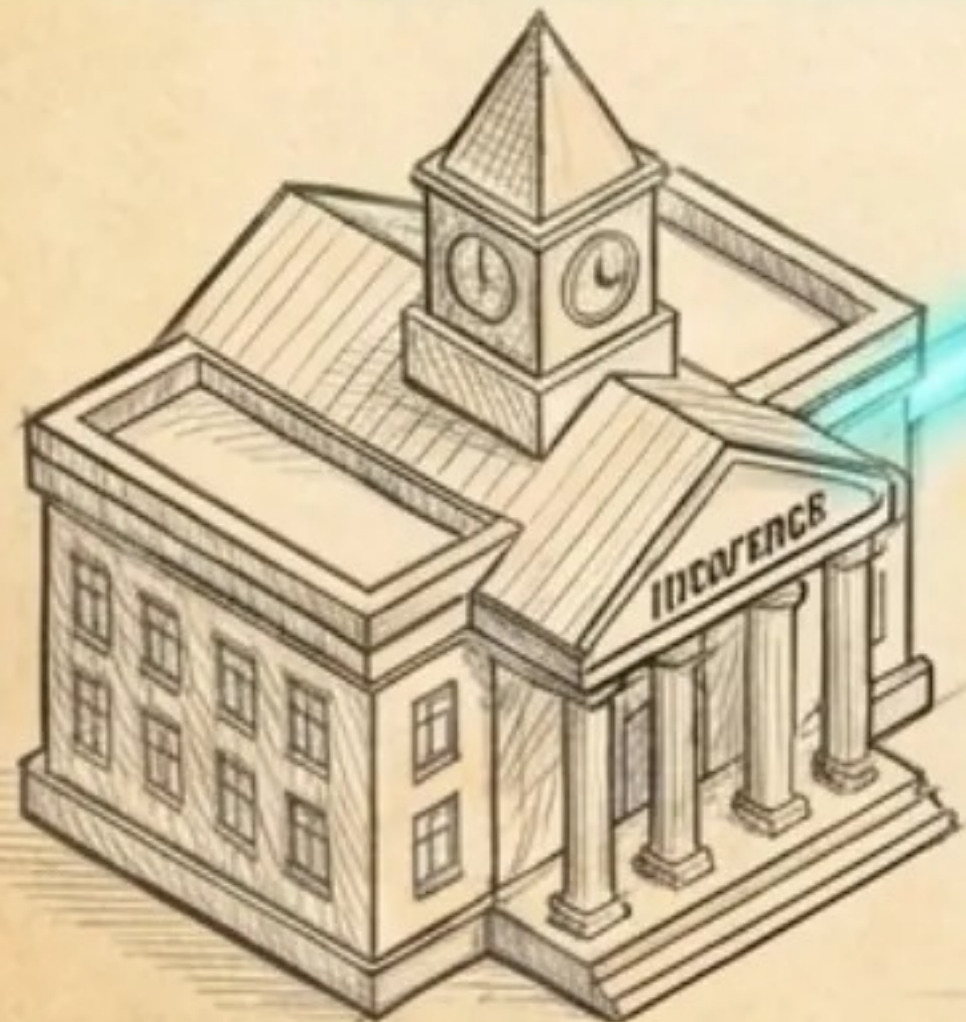

A new alternative to generic donations.

SIGNAL PASSPORT: B2B INTEGRATION

[USE CASES]

Instant scoring, insurance, HR
without repeated KYC.
Point-in-time verification.

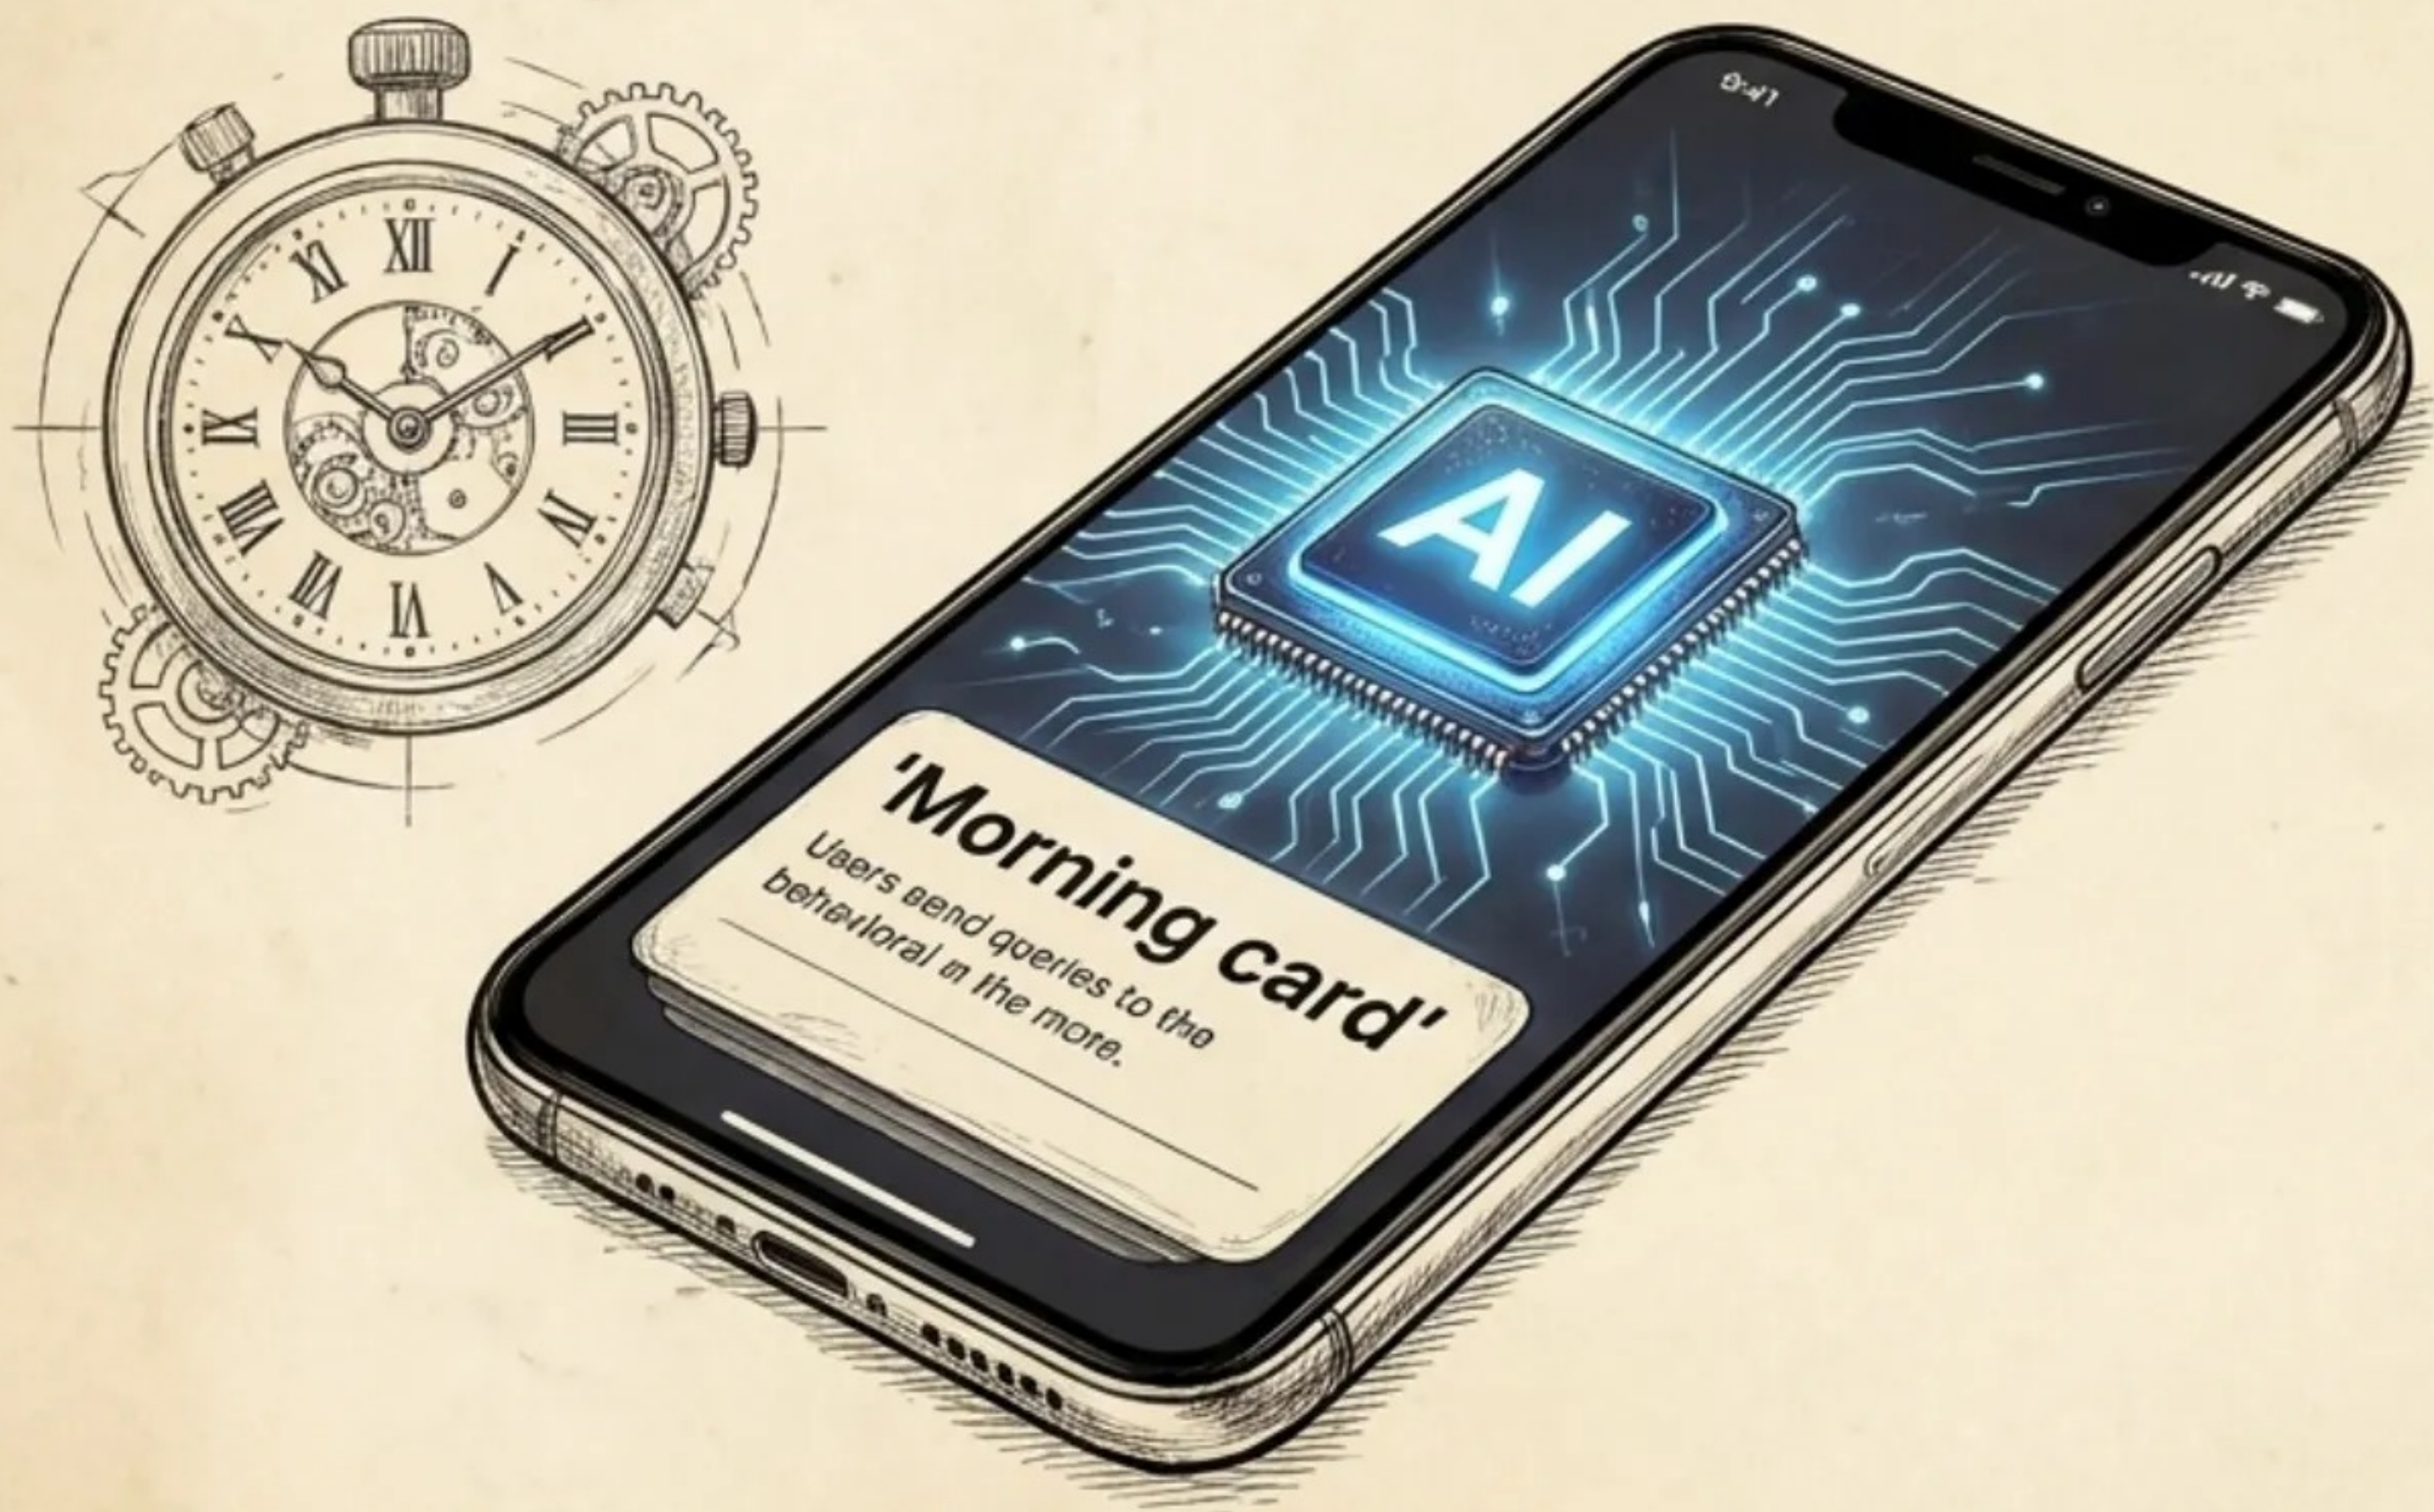

[ARCHITECTURE]

The client scans a grant to generate
an insight. Complete control over
the reading scope remains with the
device owner.

SOVEREIGN EXECUTION: PERSONAL ORACLE

Phase 2

Users send queries to their own personal behavioral Wiki.

Local execution (Phi-3-mini) on device NPU. 100% offline. Response in 1-3 seconds.

Raw user data never leaves the device.

BUSINESS MISSIONS: MONETIZING ACTIVE INTENT

1 Retail and AdTech pay for targeted physical and digital actions.

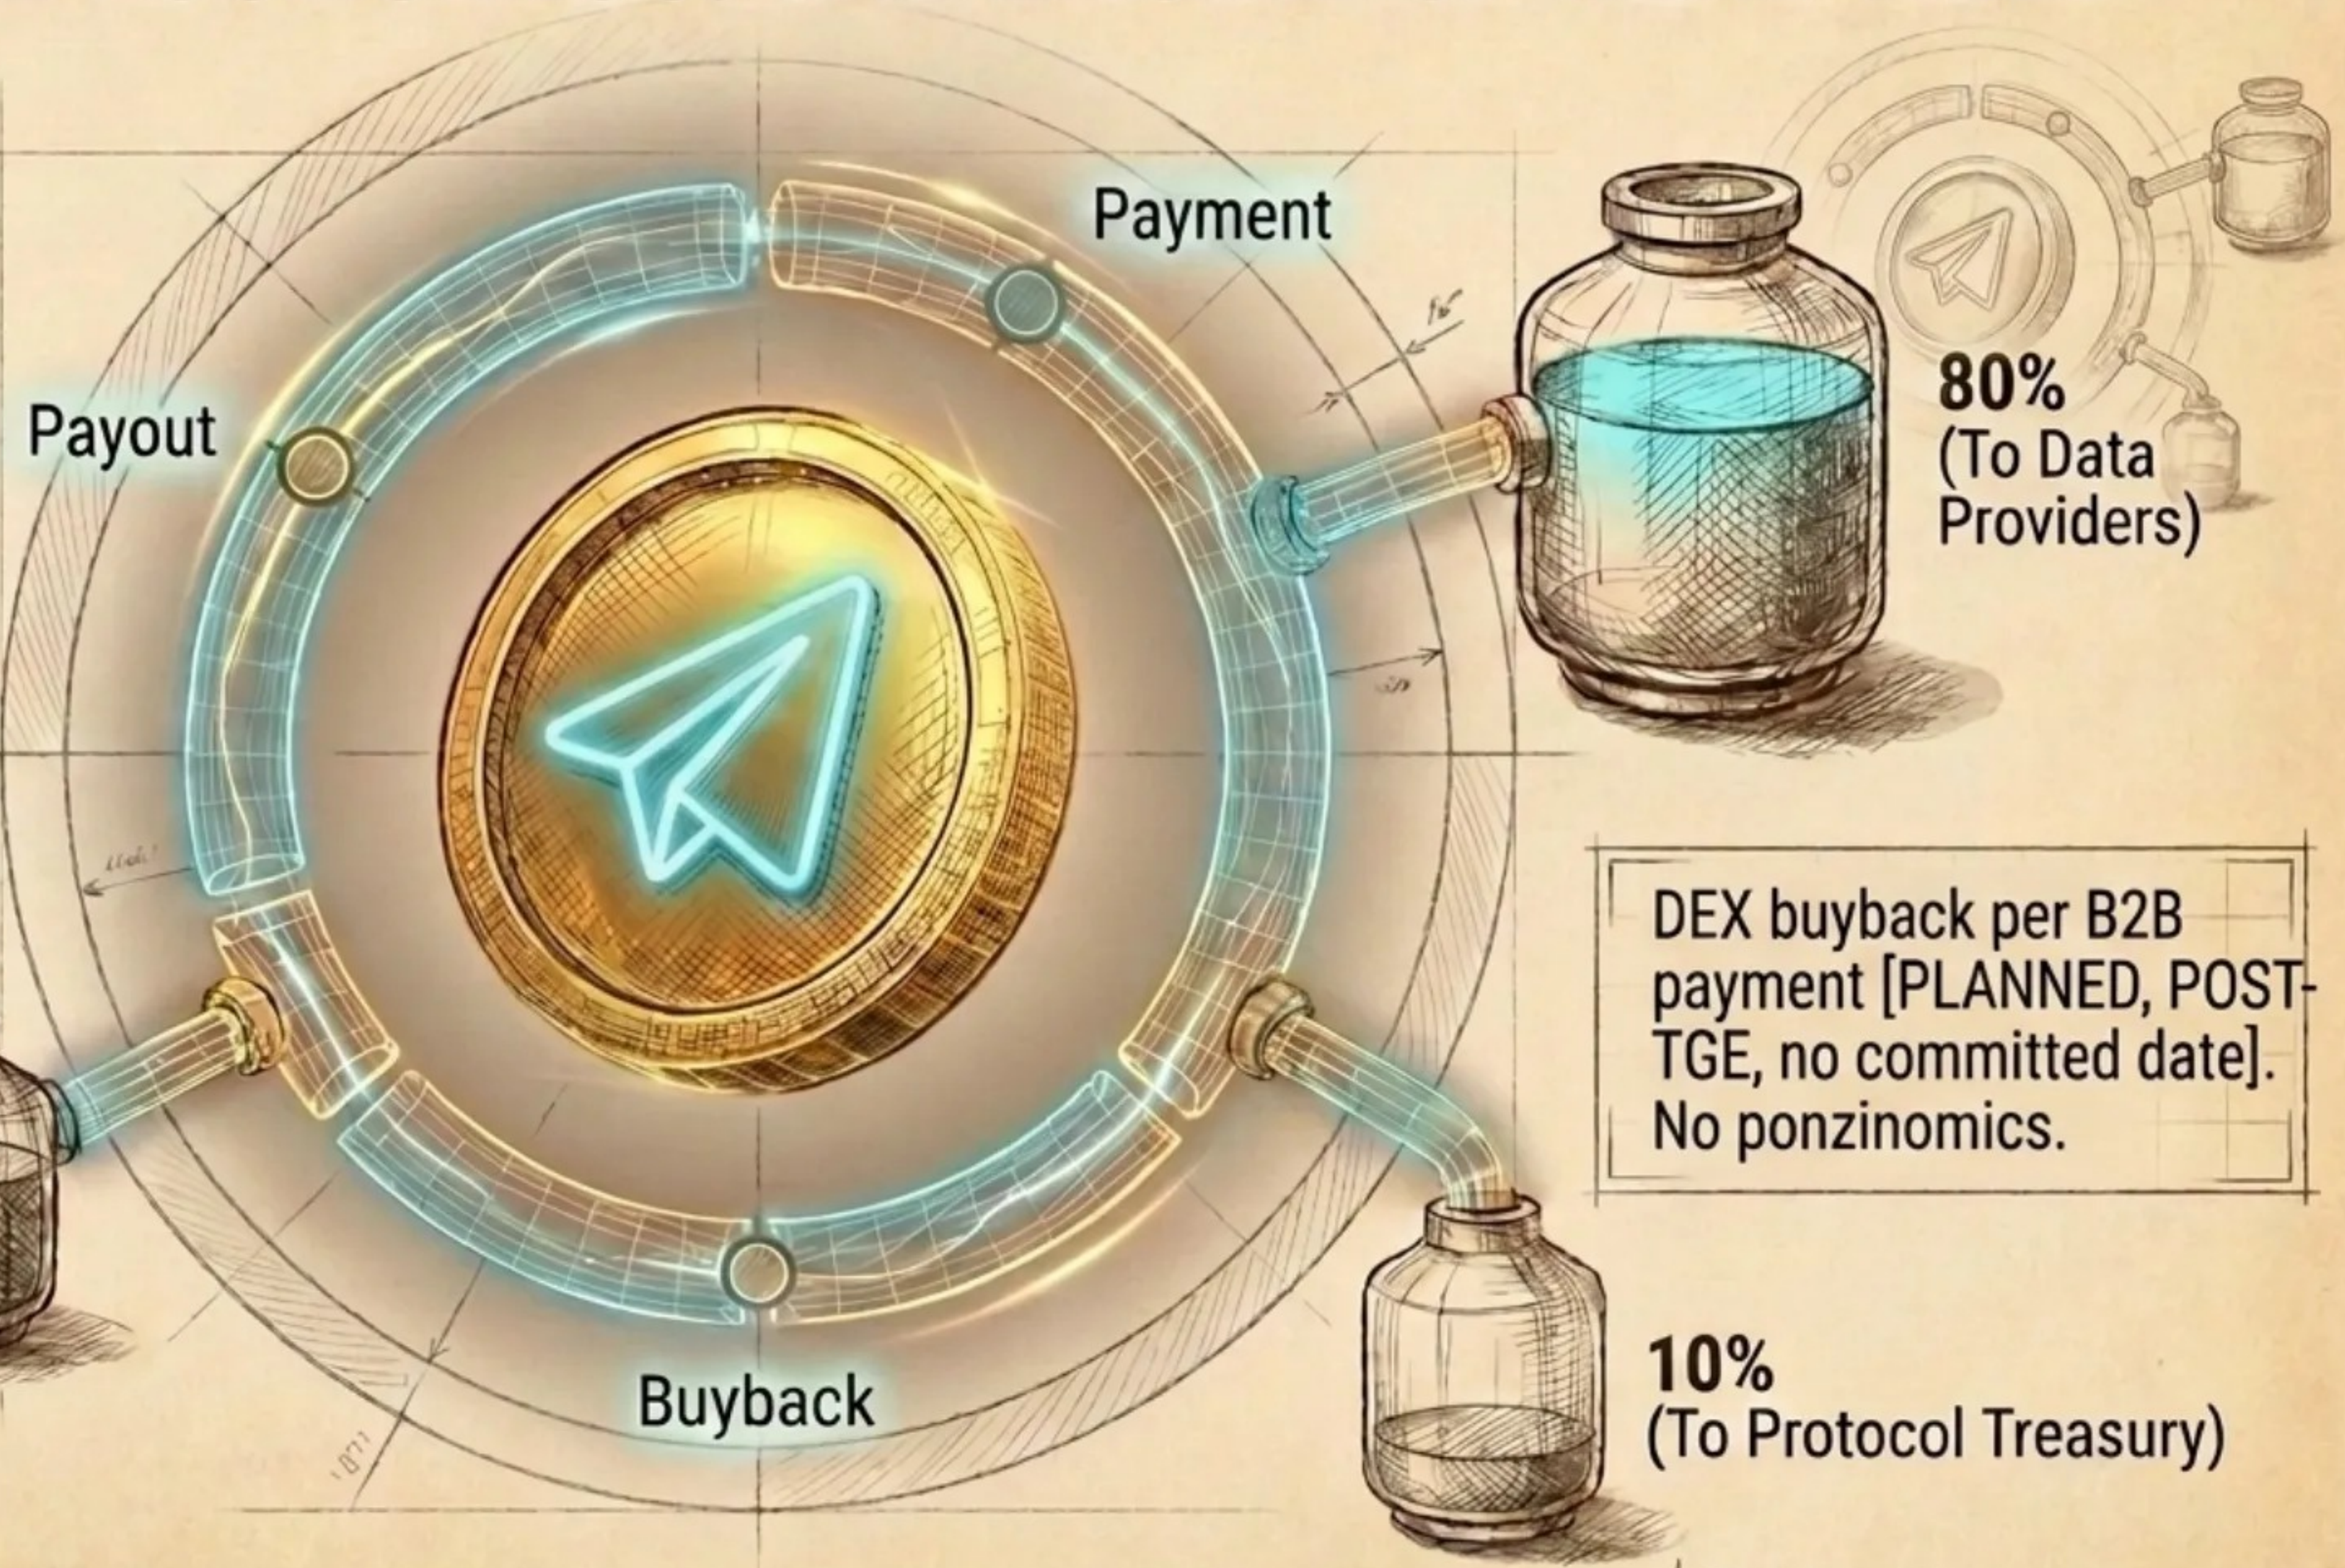

2 Geo-context verification without revealing raw routes (BSSID hashes, geohashing).

Fair reward for
real intent.

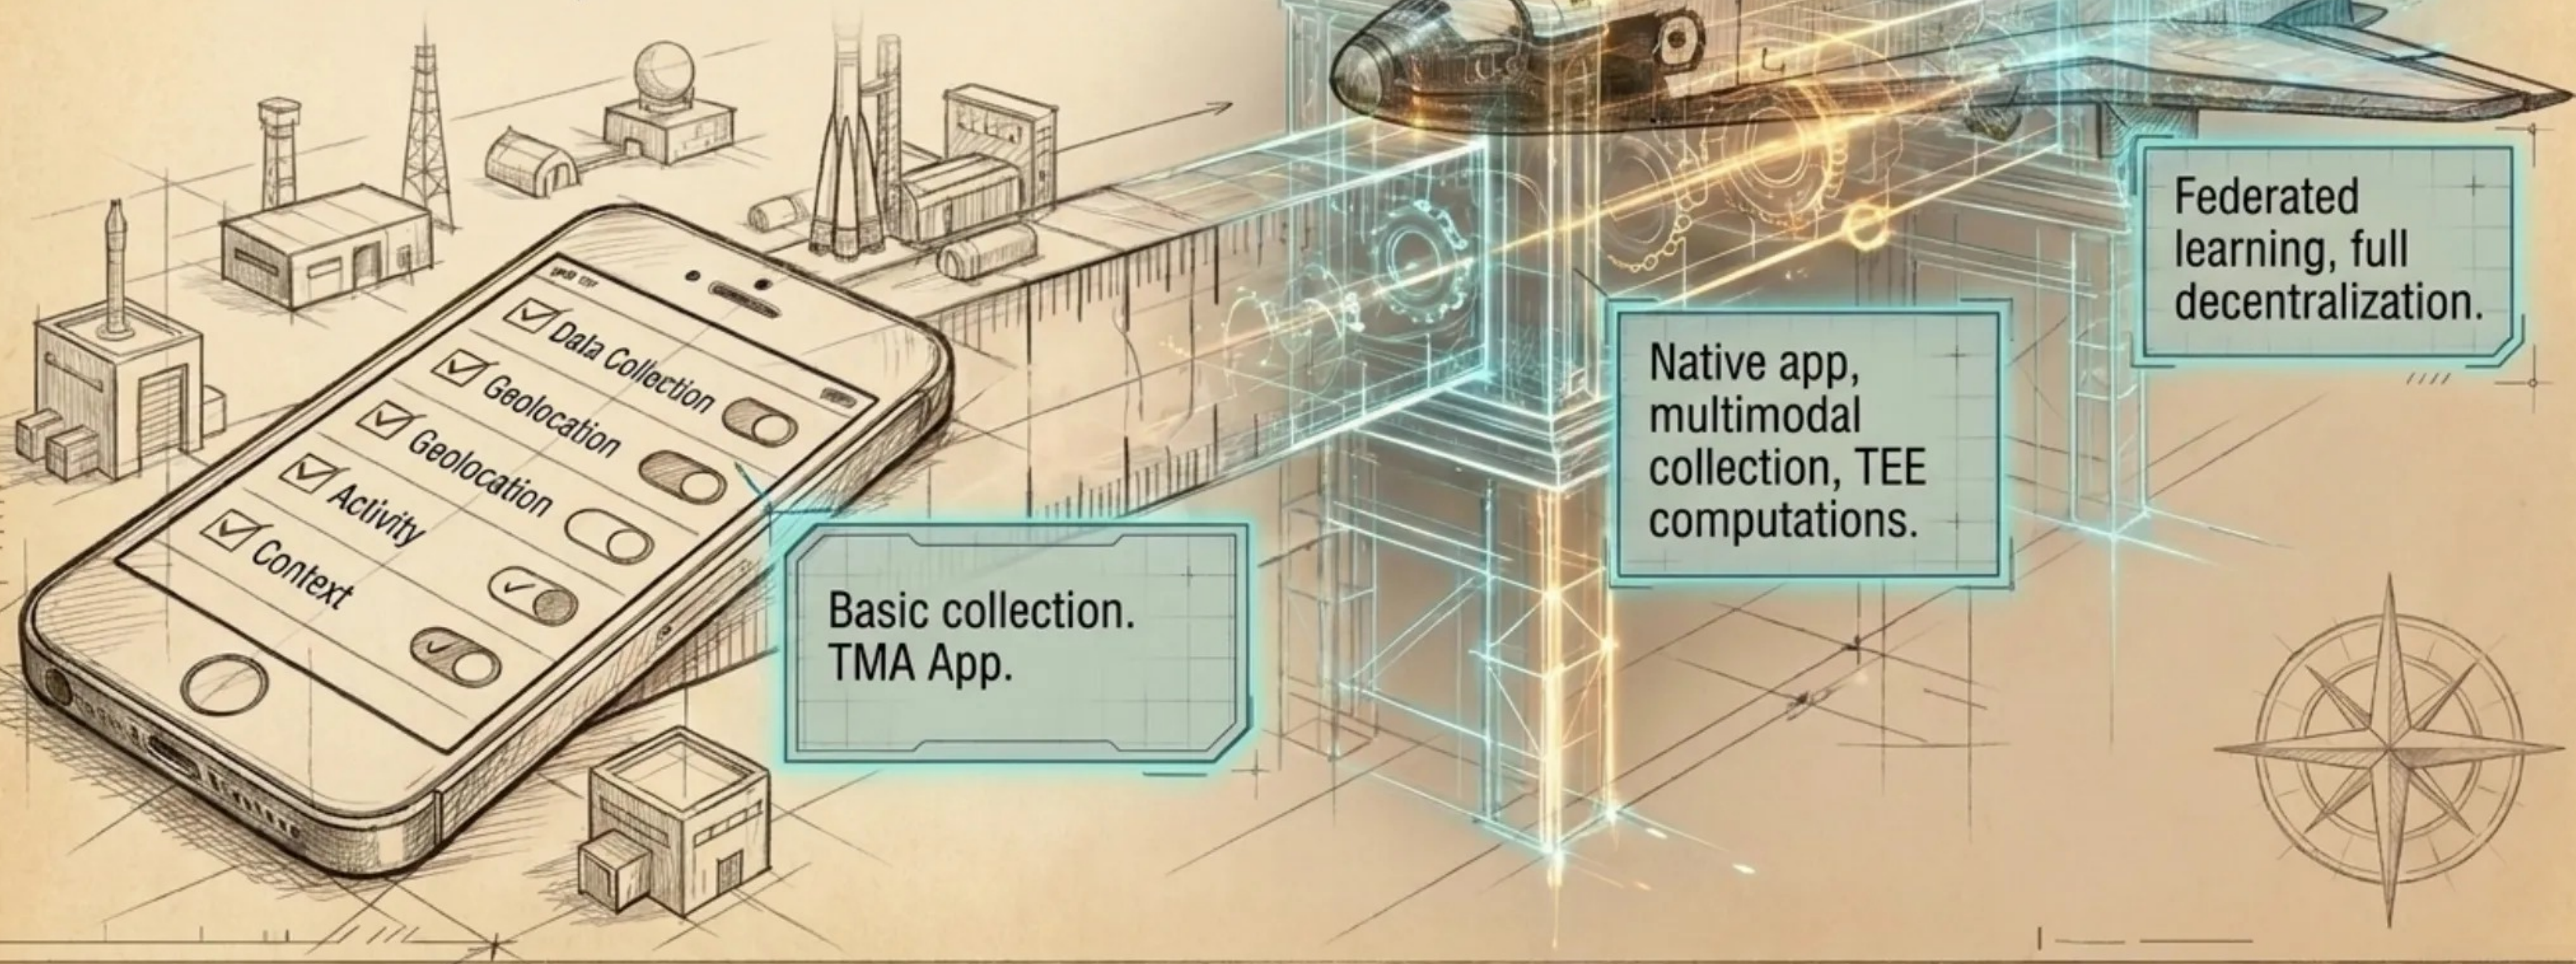

SUSTAINABLE ECONOMICS: THE ENGINE OF REAL YIELD

Every payout is backed
by real B2B revenue
via DEX buyback.
No mint() function.

ARCHITECTURAL EVOLUTION AND SYSTEM STATUS

Phase transitions are activated by hard retention and revenue metrics, not calendar dates.

TEAM AND MARKET

AI Labs (Anti-model collapse)
FinTech & Banking
Web3 DePIN
Retail

TEAM:

Sergey — Product,
Architecture (Russia)

Thao — Core,
Rust/TEE (Vietnam)

Mohammad — Frontend,
TON Connect (Pakistan)

Prashant — Backend,
Distributed Systems (India)

Building since early 2026.
(YC App: "active building
since early 2026")

Vietnam

India

Russia

Pakistan

The protocol core is designed.
The fundamental base is deployed.

INVESTMENT REQUEST: PRE-SEED ROUND

Raising \$250K-\$300K.

Reaching 500 initial users with 20% D7 retention.

Securing a 12-14 month runway.

Closing first commercial B2B pilots.
